

Sandals and Wedges fix the user's feet and ankle to the platform, improving posture and alignment.

The arm prompts help the user to stabilize arms, improving shoulder and head posture.

An additional Seat Pad and fleece covered top strap can be added to the stander to help limit a user's neck extension.

#### Dynamic Stander Components

1. **Casters** lock for safe transfers into and out of the stander.
2. **Adjustable Seat Pad** allows minimal to full weight bearing.
3. **Soft & Fleecy Straps** give back or neck support.
4. **Body Support** adjusts in height and width.
5. **Knee Straps** help achieve abduction.
6. **Wide Open Deck** provides easy access for child.
7. **Washable Bib** keeps body support dry and clean.
8. **Communication Tray** holds small objects and can be height and angle adjusted.
9. **Arm Prompts** assist with head and shoulder control.
10. **Large Wheels with Spoke Guards** pop on and off at the push of a button. The spoke guards protect fingers. Wheels can be locked in place.

AK150 Dynamic Stander Frame (with accessories)

The Dynamic Stander encourages the child to stand upright and to participate in indoor and outdoor activities allowing the user to move around and interact with friends.

The Dynamic Stander helps by supporting the user to stand and to weight bear.

Using an arm prompt to stabilize the upper body, the user is able to effectively operate her communication device.
