

## RIFTON TRICYCLES

Children love to cycle. The Rifton Tricycle and range of prompts makes it possible for nearly anyone to be able to ride. The tricycles incorporate modern design along with a fantastic range of colours. While the tricycle is fun and has social interaction benefits for the user, therapist and family, it also promotes leg strength, balance, fitness and endurance. The tricycle is designed to adjust to the users needs and growth.

*Standard Rifton tricycle frame comes with self-levelling pedals with sandals, adjustable back support with belt and a seat belt.* There are many other options available including abductor, truck support system, guide bar and front pulley.

### Tricycle Features:

- Puncture proof wheels. Smaller wheel size provides a stable base with low centre of gravity and is easier to transfer on and off.
- Low gear ratio helps to maintain and manage a safe speed and encourage exercise to improve leg strength.
- Looped or standard handlebars can be adjusted to suit the user.
- Parking brake grips both wheels.
- Storage box to transport items.
- Hook and loop straps keep feet safe and secure.

## RIFTON TRICYCLE ACCESSORIES

**Warning**  
*These tricycles are designed for use on level ground and on pavement only. User should be under competent supervision at all time.*

**This trike is a god-send!** *Our son feels normal when he rides it. The Rifton tricycle deals with his needs and is easy to adjust any way we want it. In short, the Rifton tricycle gives our son his freedom!*

**Charles and Michelle Gibson**

Both small and large seats are made for comfort and safety.

Communication Trays are available for all Rifton Tricycles.

The Trunk Support System stabilizes a child with poor balance.

The Guide Bar snaps into place, tool free. You do the steering and pulling, the wheels and pedals move around assisting a new rider learning movement and balance. *Above, Tyler gets a special ride with the Guide Bar.*
