

## LECKEY EARLY ACTIVITY SYSTEM

(Complete positioning support for children up to 4 years old)

Model No.: **GOB-EAS**

The Leckey Early Activity System (EAS) has been designed with the insight of parents and therapists to help maximise the potential of children with various disabilities. The EAS enables children with disabilities to play safely. The child can be positioned in a number of different ways in order to achieve physical and cognitive developmental goals, such as trunk and head control, hand-eye coordination, spatial awareness, balance and strength.

Positions include: Supine (back lying), Prone (lying on front), Long sitting (side lying & floor lying), Four point kneeling (hands & knees). The EAS includes a series of flexible and versatile position supports, a Velcro mat, an easy to follow illustrated guide, in a handy carrying bag. Ideal for clinic or home based programs.

Supine position.

Prone position.

Prone sitting position

Long sitting position (side lying)

Four point kneeling position (hands & knees)
