

TADPOLE PAEDIATRIC POSITIONER

(Complete positioning support for children up to 3 years old)

Model No.: **GTF4772T**

Designed for early intervention programs to position infants and young children with cerebral palsy, motor delays or other motor dysfunctions in sitting, prone and side lying. The Tadpole includes 1 Base (86 x 48 cm), Half Roll, Lateral support, 1 Wedge, and 1 Tray with mirror in a carrying bag. Ideal for clinic or home based programs.

- **Prone** - With the half roll and two lateral supports, the Tadpole positioner facilitates active body extension, head flexion, chest elevation and forward propping of arms for midline hand touching. A mirror encourages child's curiosity. Place the roll under the base for vestibular activities.
- **Seated** - Use base and wedge modules together for long leg sitting. Either side of wedge may be used depending on the need for a more upright or reclined position. Tray attached to the wedge provides additional support and a surface for eye-hand activities.
- **Side-lying** - Attach log roll to base for side-lying to facilitate control of lateral head and trunk movements. Prop base to position the child for improved respiration.

Long leg sitting

Tadpole allows postural drainage

UNIVERSAL GRASSHOPPER SYSTEM

Complete positioning support for children and adults

Model No.: **GTF4775**

A set of 17 Tumble Forms shapes assists therapists to position children and adults. Incorporates adaptive positions such as side-lying, prone, supine, long leg and log roll sitting into treatment session. A padded coaster base allows the patient to be moved while maintaining adaptive support. Use Tumble Forms logs on the base also transforms it into an active therapeutic system for vestibular stimulation activities.

Universal Grasshopper includes:

- 1 Padded Coaster Base, w/locking castors, 142 cm long.
- 1 Trapezoid Module, 13 x 46 cm.
- 1 Rectangular Module, 14 x 28 cm.
- 1 Large Wedge, 20 cm high.
- 1 Small Wedge, 15 cm high.
- 1 Accessory Wedge.
- 2 Quarter Roll Supports.
- 3 Side Abductor Modules.
- 1 Log, 122 cm.
- 2 Wrap Straps.
- 1 Pull Strap.
- 1 Hip Strap.
- 1 Side-Lyer Strap.
- 1 Accessory bag.

Grasshopper is a multi-functional adaptive positioning equipment.
