

TRACTION-AND-MANIP COUCH

P3611 Electric, w/Retractable wheels, manual Postural Drainage

P3614 Electric, w/Retractable wheels, electric Postural Drainage

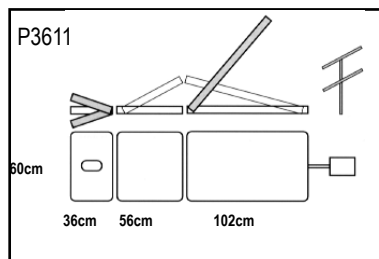

P370001 Flexion Stool, 55 x 36 cm, Adj. 36 - 51 cm

This traction and manipulative couch comes in 3 sections with a breathe hole in the head section. The head section (36 cm) can adjust +25° or -30°. The leg section (102 cm) adjusts to +80°. The centre section (56 cm) is fixed or elevates to +30° with Postural Drainage. The centre and end sections can be raised to an inverted "V" position to provide Postural Drainage. The centre and leg sections move laterally up to 12 cm to provide a 'Friction Free' facility for lumbar traction and can be locked positively in any position.

A height adjustable mounting bracket for traction unit which rotates to either side is located at the end. It allows for both spring-loaded vertical adjustment of the traction mounting plate to maximise the flexion angle for vertical traction; and for lateral adjustment to obtain easy access to the foot of the couch and to regulate traction force.

Features:

- Top comprises 40 mm high density foam upholstered with fire retarded vinyl on a 20 mm plywood.
- Electric foot switch adjusts height 54 - 104 cm.
- Length is 198 cm. Standard width is 60 cm.
- Choices of options and/or customizing to suit your needs (see P-1).
- Lifting capacity 200 kg.
- Choice of colours (see P-1). Standard colour is Balmain Navy.
