## SPECIAL TOMATO SOFT-TOUCH SITTERS

The Special Tomato® Soft-Touch Sitter provides a soft, supportive seat in the same way as the Tumble Form Floor Sitter. But its soft feel provides greater comfort for your child. This sitter is made of a latex-free seamless material that is peel and tear-resistant. The material withstands cracking, is impermeable to fluids, and can be cleaned easily with standard disinfectant.

The Special Tomato® Soft-Touch Sitter comes in 5 sizes. The sitter allows the user to comfortably sit while engaging in various activities. The sitter can be strapped to a standard chair to allow your child to sit at a table that would normally be too high for the child to access.

There is a choice of 3 Sitter systems: The Sitter only, Sitter with Tilt Wedge Kit, and Sitter with Mobile Tilt Wedge Kit.

All systems feature:

- Soft contoured seat with integral anti-thrust seating surface.
- Contoured lateral and head supports.
- Adjustable 5-point positioning harness.
- Attachment straps.
- Standard Colour: Chocolate/Tan.

The Sitter with Tilt Wedge Kit and the Mobile Tilt Wedge Kit provides a stable base for your child and allows from upright to 25 degrees of tilt to provide the desired angle to suit your child. The Mobile Tilt Wedge Kit comes with 4 swivel casters with foot-operated lockable rear brakes to ensure safety. The swivel casters allow your child to be easily moved from one activity to another without having to change their seating position.

SSP553879 Sitter Size 3 attached to a standard chair allows the child to sit at a high table

Anti-thrust seat surface.

SSP553890 Mobile Tilt Wedge Sitter Size 3.
