SPECIAL TOMATO MULTI-POSITIONING SEAT & CAR SEAT

The Special Tomato® Multi-Positioning Seat has been designed to offer comfortable and proper positioning support. Designed for use at home, on the bus, at school, and anywhere else your child's busy lifestyle takes them. The soft, lightweight, and durable seat allow for individualized adjustment. The seating surface is soft for comfort, but are supported by the seat shell to maintain position. Cushions are made from a new latex-free material that is not only soft, but is tough and durable to withstand deflating and cracking, and is impermeable to fluids.

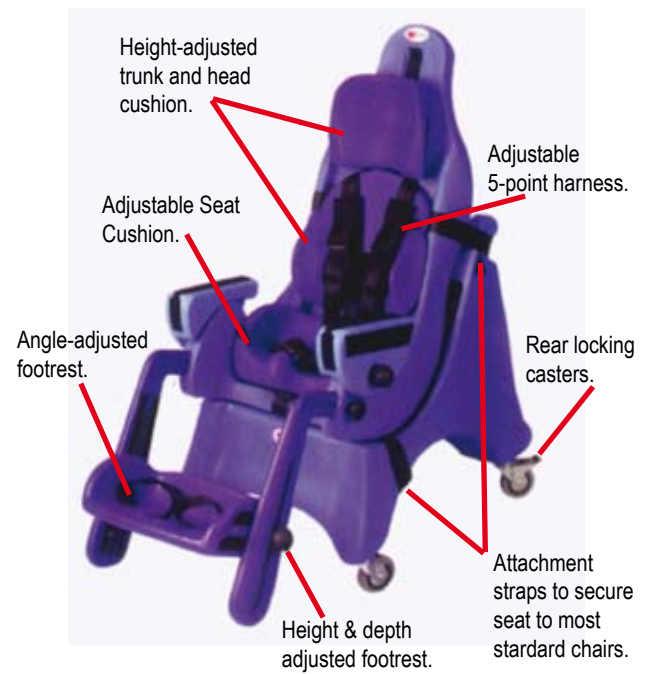

The Special Tomato® Multi-Positioning Seat features a contoured Seat Cushion complete with the Hip-Flex™ adjustment that pivots 30 degrees to adjust the seat-to-back angle for proper alignment of your child's pelvis. Also included is a Back Cushion that is height adjustable and contoured with lateral supports, and a height adjustable and contoured Head Support. The Footrest is height and depth adjustable with ankle straps.

The Seat Cushions use hook and loop and our track system for easy adjustment. The Hip-Flex™ adjustment provides a range of positions between 15 degrees of hip flexion and 15 degrees of hip extension without reclining the seat back. This system allows true seat back angle adjustments while maintaining upper body alignment by changing the orientation of your child's pelvis.

Built-in Attachment Straps can be used to secure the Special Tomato® Multi-Positioning Seat to most standard chairs found in the car, home, community, or school. This makes it perfect for peer interaction, sitting outside on the deck, or dinner at your favourite neighbourhood restaurant.

The Special Tomato MPS is FMVS213 compliant and can be used for car seat for user up to 68 kg. A Tether system is included in the car seat version. It has been successfully tested and Approved for aircraft travel (FAA approved).

The Special Tomato® Multi-Positioning Seat offers years of growth for your child. This unique design allows you to make simple adjustments to the Head & Back Cushions as your child grows. In addition, there are two Seat Cushion sizes allowing you to increase the seat width and depth for an average of 7 years of growth. Now you have your choice between two height adjustable and contoured Head Supports. If your child needs more lateral support, the Lateral Head Support is a great option to try!
