

SEATING & TRANSPORT EQUIPMENT

THERAPY BENCH

Many therapists describe the need for stable sitting to achieve maximum arm and hand movement for play. Our Therapy Benches are ideal for children who do not need back support in sitting but need a firm padded seat which can be adjusted in height and angle so that the feet rest on the floor with good lower back extension. The solid construction makes the bench ideal for children who are learning to move from one level to another; from the floor to sitting on a bench, from side sitting to upright kneeling, or from sitting to standing. It can also be used as a table.

Therapy Bench STB3 & STB4 folds for easy storage.

Therapy Bench STB2 & STB1.

POSTURE SYSTEM

Models No.: **STB1-AO, STB2-AO**

This posture system, added to the Therapy Benches, can be combined in various ways to provide additional stability in sitting. The three part pelvic support adjusts the seat depth so that the length of the thigh can be supported on the seat surface. The adjustable height of the posterior support maintains the pelvis in a vertical position. Adjustable lateral pelvic supports minimize asymmetry in weight bearing and deviation from the midline. The femoral stabilizer with abductor, combined with pelvic support, prevents posterior tilting of the pelvis as well as rotation or obliquity of the pelvis. This component also stabilizes the hips and thighs in neutral alignment. The components of this seating system can be combined to cater for a child's individual needs.

Therapy Bench STB1, STB2 & STB5.

THERAPY BENCH BACK

- Fits STB2 and STB5 Therapy Bench.
- Back support is removable. Back size 35.5 x 35.5 cm. Tilts 15° from vertical. Adjustable seat depth.
- Lateral supports are height, front-rear adjustable. Width adjusts from 18 to 38 cm. Removable.
- Work with Femoral stabilizer from STB1-AO and STB2-AO.

PELVIC SUPPORT COMPONENT

- Seat depth adjusts 12.5 - 26.25 cm
- Back adjusts vertically 7.5 cm
- Lateral supports adjusts 12.5 - 27.5 cm

FEMORAL STABILIZER COMPONENT

- Adjusts in and out.
- Knee pads 10 cm wide, 17.5 cm high.
- 7.5 cm wide adjustable abductor.

Posture System STB2-A0 shown on STB2 Therapy Bench, adds firm control for the pelvis and femurs.
