

# SEATING & TRANSPORT EQUIPMENT

## RIFTON COMPASS CHAIR

This new ergonomic chair from Rifton is for children with moderate positioning needs. Children are supported and secure in the comfortable, "hugging" feel of the lateral supports. The strong plywood sides are screwed into dado joints to reinforce an already sturdy chair.

Children concentrate better when they sit snugly against the table such as a Rifton Multi Table with their arms at table height. The short yet high armrests allow for a comfortable seating position for learning.

For children with moderate positioning needs, high armrests provide upper body support and encourage self-supportive sitting. The ergonomic curves of the Compass Chair promotes correct posture.

For further support, clip on the Hip Belt that extends from behind and below the child at a 45° angle. Remove it by squeezing the quick-release clip. Children can fasten the two-piece strap with a dual-adjust buckle.

## COMMUNITY PLAYTHINGS MULTITABLE

**C-A915**                      112 cm W x 56 cm D x 41 - 61 cm H

Therapists work with children who are different sizes with diverse needs, and use a wide range of adaptive equipment. They don't need the added challenge of finding the correct table height. This is why one school therapist told us that MultiTables, the complimentary table for the Compass Chair, is her table of choice as she moves from classroom to classroom and from child to child.

One MultiTable can accommodate any therapy session. Each leg is hand-adjustable (no tools needed), allowing you to angle the tabletop. MultiTables are lightweight and portable- simply unscrew the legs, clip them beneath the tabletop and carry the MultiTable under your arm to the next appointment.

Made of double-side laminated solid birch plywood. FAS stocks the most common model - C-A915. Other shapes, sizes and heights are available on special order.

Multi Table can be quickly set at various heights for different activities.

Multi Table set at right height for sitting.

MultiTables come in all shapes and sizes.

MultiTables are lightweight and durable.

Multi Table can be quickly set up and disassembled, stackable for storage and transport.

Laminated birch plywood protects the table from warping and makes it easy to clean.
