

SEATING & TRANSPORT EQUIPMENT

RIFTON ADVANCEMENT CHAIR

This new chair is available in three sizes and is built to last with hardwood chair frame, steel and fiber-reinforced plastic components. They are designed for use with the M.O.V.E. Program with an aim to encourage a child to not just maintain seating posture, but to also develop sitting skills. Sitting in a slightly forward leaning position from the hips encourages the child to actively control his or her head and shoulders. Enough supports (forearm supports, straps, footboard etc.) are available to maintain an initial functional posture. As the child progresses with training, supports can be removed or repositioned so as to free up the shoulders, arms and hands for eating, writing, playing and communicating. The footboard can be slid back to practice sit-to-stand with feet on the ground.

As a fully functional adaptive chair it is very adjustable (all tool free) to suit a range of users and conditions. Seat depth and height are easily adjusted. The backrest can move through a 15° range. The entire chair can provide up to 20° forward and 5° backward tilting. The trunk support pads with strap can be adjusted in width, angle and height. The L-bar swings out of the way so a child can be seated and transferred easily. The arm prompts can be fitted anywhere along the L-bar as required for arm positioning. The groin strap can assist child in maintaining correct pelvic positioning.

Options include: Flat or Contoured Headrests, L-Bar, Abductor, Leg prompts, Trunk Support, Sandals and Wedges and Arm prompts.

Rifton Advancement Chair in forward-leaning position including L-Bar, encourages the child in learning to sit, to control her head and to interact with others.

Groin strap assists in improving pelvic positioning.

L-Bars swing-away allowing for an easy transfer.

The Arm Anchor with Multi-table (C-A915) is an alternative to allow the free hand to work.

Size	Small	Medium	Large
User Height, cm (selection key)	86 - 117	107 - 148	135 - 183
Frame Width, cm	56	62	71
