

SEATING & TRANSPORT EQUIPMENT

CONVAID CRUISER PLANAR

The new and improved Cruiser Planar is made up of a special version of Convaid Cruiser and a padded solid back and seat. The solid back and seat can be removed from the mobile base, allowing the base to be folded as a lightweight, compact umbrella stroller. The Cruiser Planar offers more in-depth seating and positioning. Additional supports such as firm lateral supports and contoured headrest with extension can be added onto the solid base to enhance posture and sitting comfort.

The Convaid Planar provides better comfort for longer seating periods, more in-depth seating and positioning and better trunk posture to improve respiration and digestion. Other Convaid positioning supports can also be used in this chair. The mobile base has fixed 30° tilt. It comes in 10", 12", 14", 16" and 18" seat width with choice of fabric colour and wheel options to suit individual needs.

Standard Model includes: Frame, 2-piece firm backrest and a solid support cushion, the basic seat and back upholstery with hardware, closure strap, toggle wheel locks, 3-point positioning belt with depth adjustable crotch strap, and adjustable swing away footplates with footplate secure strap.

Transport Model includes: Above options plus contoured firm headrest extension, H-Harness with padded covers and foot positioners.

Main features include:

- NEW Heavy-Duty Transit Tyres as standard.
- 30° fixed tilt.
- Provides comfort and support for longer periods of sitting.
- More in-depth seating and positioning.
- Provides good trunk posture for better respiration and improved digestion.
- Complete line of positioning options available.
- Seat and back remove for compact folding.
- Transit models and been crash tested.
