

SEATING & TRANSPORT EQUIPMENT

E-Z-ON VEST

Made in the USA, the E-Z-ON Vest is the first choice of child restraint system for road transport for those with behavioural conditions or physical disabilities. The **E-Z-ON VEST** has been tested to meet US Federal Motor Vehicle Safety Standards (FMVSS213). The vest supports the wearer upright. The back zipper closure discourages unauthorized opening or removal. There is a range of accessories to cater for different needs.

E-Z-ON ADJUSTABLE VEST

The E-Z-ON Adjustable Vest comes with adjustable shoulder straps, chest straps and waist straps to cater for growth and different clothing. Three zipper positions ensure proper fit. Vests fit users aged 2 years to adult. Sherpa Neck Pads (SV100NP) cover the mounting clip and deter the user from undoing the clip. Bar slides help deter children from loosening adjusters.

Features:

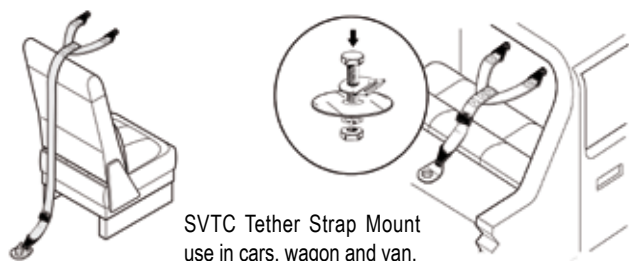

- Vest can be put on before entering the vehicle, eliminating the struggle in the confined space of the vehicle.
- Vest is quickly clipped on to the vehicle mounting strap.
- 4 mounting straps, i.e. Portable Seat Mount, Permanent Floor Mount, Tether Strap Mount and Wheelchair Mount allow the vest be used in different vehicles - the family car, school bus or wheelchair.
- Webbing and zippers are extra strong to withstand wear and tear.
- The vest is machine washable.

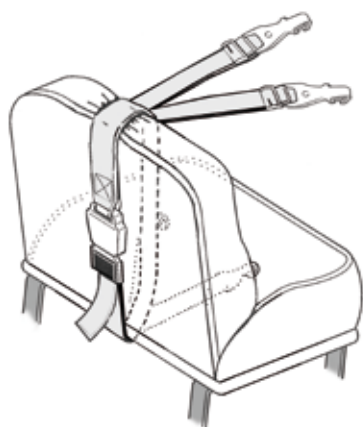

front

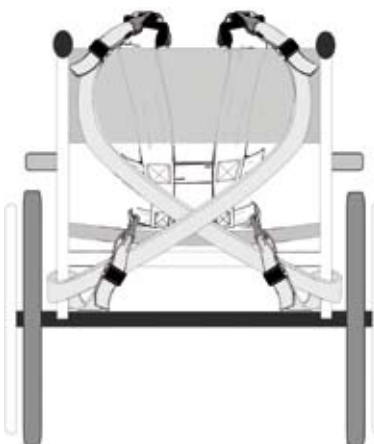

back
