

TOILETING AIDS

BLUE WAVE SHOWER COMMODE

Add a Mobile Frame and accessories to the Blue Wave Toileting System and you get the Blue Wave Shower Commode. It is not only used for gaining access on and off the toilet, but it can also be used as a Shower Chair with variable back angle, whether leaning forward or reclining. The large, deep pan with pouring spout can be placed or removed from the front or the back.

Specifications:

- Fits institutional, school or home toilet types.
- The contoured seat is ergonomically designed to centre child's hip on the seat. The soft deflector and seat cover is removable for cleaning.
- Armrests help child to support their own trunk and can be easily removed for open access.
- Hip strap adds security. Chest straps come with Backrest.
- Backrest can be adjusted to angles at 85°, 95° or 105° allowing the user to lean forward or recline. It can be folded flat for storage and removal. High backrest comes with head support.
- Two seat depth settings. Quick release mechanism allows easy change of backrest and/or seat depth for different children.
- Anterior Support used as a tray and support the user when leaning forward.
- Abductor provides comfortable knee abduction.
- The sturdy plastic Mobile Frame has slots for height adjustment which allow the user to sit high or low as required. 75 cm castors are easy to manoeuvre.
- The footboard and seat adjust independently to a comfortable seat height. Comes with straps to hold feet down.
- Lower the seat, remove the foot board then the user can sit with his feet on the floor.

Blue Wave Shower Commode allows the child to sit at the right height while toileting, either over the toilet or as a stand alone commode for toilet training.

Low Back Commode w/ Anterior Support encourages forward leaning.

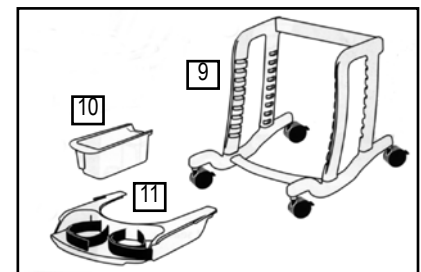

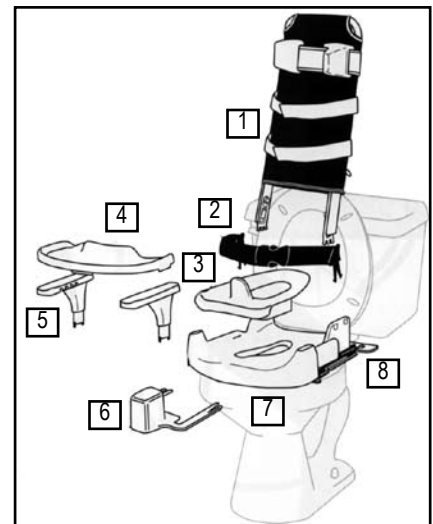

Headrest and anterior support help child maintain good posture.
