RIFTON PACER GAIT TRAINER

"It is a fantastic design. It is so versatile. This equipment is designed according to all 'simple basic' mechanical principals." our engineer commented.

Rifton has given Pacer a new look by introducing stylish metallic colours - red, purple, lime, raspberry blue and champagne. Now you have a choice of colours to suit your taste. In addition, the prompts have been re-designed with improved functionalities and features.

Pacer Gait Trainer is so versatile that it can suit a highly involved child using all the options or a child requiring little support using just the frame. For a child without active use of trunk and leg muscles, it provides the necessary supports for gait training. The range of accessories allows for full to no weight bearing.

Main features:

- A sturdy, colourful lightweight aluminium frame that is height adjustable and foldable for easy transport.
- Each large castor offers 5 functions – gradual brake/drag, brake lock, swivel, swivel lock, and one-way ratchet control. They offer a wide range of control in speed, direction and manoeuvrability.
- The prompts can provide controlled support and positioning whenever it is needed. They are well padded for comfort.
- Each prompt comes with its own clamp and/or post and can be attached (tool free) to the frame and adjusted independently according to the individual's needs.
- Prompts can be purchased independently to suit different needs.

The newly designed small Pacer Gait Trainer is lighter and maneuverable.

The new Mini Pacer Gait Trainer with new guide bar and Hand Loop for infants & toddlers.

New Hand Loop Option

The New X-Large Pacer for young adults.
