

WALKING AIDS

KAYE SOFT SLING SUPPORT

Model No. **WSSS1**

Measurements:

- Sling is 9 cm in height
- Sling adjusts from 45.5 - 76 cm.

The soft sling support is suitable for Kaye Walker sizes W1/2, W1 and W2, and also the new Red Walker. The sling provides additional stability at the hip and pelvis to centre the child in the walker. This sling is useful for walker training when the child does not have enough muscle strength or is in danger of falling. The sling fits between the users legs and surrounds the pelvis, the sling buckles to the walkers with 4 adjustable straps.

WSSS1 on a W1BS.

KAYE ADD-A-SEAT

Now you can Add-A-Seat to your existing Kaye Posture Control Walker no matter what wheel configuration you have. The Add-A-Seat comes in 3 sizes and can be added to the corresponding Kaye walker sizes 2, 3 or 4. For example a WW2S Add-A-Seat can be fitted to a size 2 Kaye Walker with any existing wheel configuration.

The Add-A-Seat can be folded up when walking and folded down for sitting. The Kaye walker can still be folded for transport with an Add-A-Seat installed.

A WW2S Add-A-Seat on a W2BS Walker.

Add-A-Seat Model No.	Fits Kaye Walker
WW2S	W2
WW3S	W3
WW4S	W4

A WW3S Add-A-Seat.

KAYE FOREARM SUPPORTS

This is for users who need additional support to the shoulder girdle or cannot extend their arms and take weight on their hands when walking. The Handgrip is fully adjustable from horizontal to vertical to cater for supination or pronation of the forearm. The Forearm Supports adjusts in height and angle, as well as forward-backward placement on the Kaye Walker. The forearm support can be angled away from the body, changing the forearm alignment.

WFSS Forearm Supports on a W1/2BS walker.

WFSA Forearm Supports on the New Red Walker WRF-B.

Improved design of Kaye Forearm Support (WFSS) can be angled away from the frame to change the forearm alignment.

Model No	Suit Kaye Walker Models
WFSS	W½ to W3 size Ht adjustment: 10 - 19.5 cm
WFMS	W4 to W5 size Ht adjustment: 6.5 - 25.5cm
