KAYE SWIVEL LIMITERS

Model No. **WSL-1**

The Kaye Swivel Limiters can be used to limit the amount of wheel swivel. This is helpful for users who cannot manage free swivelling wheels. The limiters can be used on any Kaye Posture Control or PostureRest Walker with swivel wheels and any Kaye Anterior Chest Support Walker models WFS and WYFS. Each limiter can be adjusted to control the amount of swivel.

KAYE ADJUSTABLE RESISTANCE ONE-WAY RATCHET REAR WHEELS

The Kaye adjustable resistance one-way ratchet rear wheel kit provides a variable resistance to forward motion. This option is helpful for people who have trouble controlling their speed and/or have difficulty slowing down. Each rear wheel can be adjusted individually.

KAYE SILENT ONE-WAY ROLLER BEARING REAR WHEELS

The 'Silent' One-Way Wheels can be installed on any Posture Control or PostureRest walker or purchased to replace the standard ratchet rear wheels on your existing Kaye walker. The internal one-way bearings are installed into rubber tires making for a smoother and quieter walker.
